

THE ADVANTAGES ARE CLEAR!

Activated carbons for treatment of drinking water

A reliable barrier to organic matter and micro-pollutants:

Providing high-quality drinking water and protecting natural water sources are your responsibility as a supplier. We'll help you meet this requirement with activated carbons that are able to bind organic content adsorptively and reduce the amount of micro-pollutants in water – even where concentrations are already low. And by so doing we'll ensure that pesticides, nitrates and pharmaceuticals don't stand a chance.

Homegrown German quality assured: We offer you activated carbons with a distinctive pore structure that achieve a high pollutant uptake and meet the strictest DIN standards. This makes them ideal for drinking water production. And the expertise of our application technicians will ensure you always use the very best product for the job.

Sustainability guaranteed: If you wish, we'll be happy to supply reactivated carbon that meets your high quality requirements. Temporary, easy-to-use 'plug & clean' solutions for up to 75 m³/hr are also conceivable, minimising your **effort and processed sustainably by us after use.**

CarboTech
The activated carbon people

CarboTech is one of Europe's leading supplier of powdered, granulated and extruded activated carbons. The company operates integrated production plants for the manufacturing, processing and packaging of customised activated carbons, activated cokes and Carbon Molecular Sieves.

Quality: Since CarboTech works consistently with its customers interests at heart, our top priority is to constantly improve operational achievements. High demands of product and service quality go without saying for every employee.

Experience: CarboTech combines experiences from production, application and process engineering. From a strategic point of view, it has traditional requirements as much in its sights as it does innovative services. The commitment of experts with a precise knowledge of practical conditions is highly prized by our customers.

Cost-effectiveness: The use of our special activated carbon products makes permanently reliable and cost-effective solutions possible.

Furthermore we offer thorough and expert advice to all the aspects regarding the selection and application of our products.

We are looking forward to hearing from you.
