

CarboTech

The activated carbon people

THE ADVANTAGES ARE CLEAR!

Activated carbons for cleaning aquarium water

Reducing organic pollution in aquarium water:

Fish in aquaria are exposed to organic pollution from feed residues, medications and excrement. If the aquarium water is not treated, the water quality will deteriorate to such an extent that the fauna is ultimately poisoned. Activated carbon from CarboTech is particularly suitable for cleaning.

pH-neutral reaction: Activated carbon from CarboTech has a neutral pH value in water and offers high capacity, making it particularly economical.

Competent advice from our experts: Their wealth of experience means our experts will be able to pinpoint the activated carbon that's just right for your aquarium.

CarboTech is one of Europe's leading supplier of powdered, granulated and extruded activated carbons. The company operates integrated production plants for the manufacturing, processing and packaging of customised activated carbons, activated cokes and Carbon Molecular Sieves.

Quality: Since CarboTech works consistently with its customers interests at heart, our top priority is to constantly improve operational achievements. High demands of product and service quality go without saying for every employee.

Experience: CarboTech combines experiences from production, application and process engineering. From a strategic point of view, it has traditional requirements as much in its sights as it does innovative services. The commitment of experts with a precise knowledge of practical conditions is highly prized by our customers.

Cost-effectiveness: The use of our special activated carbon products makes permanently reliable and cost-effective solutions possible.

Furthermore we offer thorough and expert advice to all the aspects regarding the selection and application of our products.

We are looking forward to hearing from you.
