

CarboTech
The activated carbon people

THE ADVANTAGES ARE CLEAR!

Activated carbons for natural gas desulphurisation

Removing impurities effectively from natural gas:

Natural gas is a powerful source of energy, but one that can only be used to best effect once it is freed of an undesirable substance: hydrogen sulphide. To render natural gas usable, therefore, it has to be desulphurised. This is done by passing it through large adsorbers filled with CarboTech activated carbon.

Highly activated carbon with adsorption ratios of over 100%: CarboTech supplies suitable solutions for every application: Our highly activated carbon offers adsorption ratios of above 100% and is specially impregnated to meet the exacting requirements of the natural gas industry.

Trusted by large energy companies: Our energy customers have been placing their trust in activated carbons from CarboTech for many years now. The above-average quality of our products and the unique service focus of our experienced experts make CarboTech a reliable partner in natural gas desulphurisation.

CarboTech is one of Europe's leading supplier of powdered, granulated and extruded activated carbons. The company operates integrated production plants for the manufacturing, processing and packaging of customised activated carbons, activated cokes and Carbon Molecular Sieves.

Quality: Since CarboTech works consistently with its customers interests at heart, our top priority is to constantly improve operational achievements. High demands of product and service quality go without saying for every employee.

Experience: CarboTech combines experiences from production, application and process engineering. From a strategic point of view, it has traditional requirements as much in its sights as it does innovative services. The commitment of experts with a precise knowledge of practical conditions is highly prized by our customers.

Cost-effectiveness: The use of our special activated carbon products makes permanently reliable and cost-effective solutions possible.

Furthermore we offer thorough and expert advice to all the aspects regarding the selection and application of our products.

We are looking forward to hearing from you.
