

CarboTech

The activated carbon people

THE ADVANTAGES ARE CLEAR!

Activated carbons for combating odours and cleaning spent air

Reliable removal of air-borne pollutants: Almost all manufacturing industry has to deal with polluted air in some shape or form. Spent air is also a challenge in places like commercial kitchens, printing works, sewage treatment plants and inner-city tunnels. But whether air is to be filtered at specific locations only or throughout an entire production bay – CarboTech activated carbon means you can breathe a sigh of relief without any risk to your lungs.

Staying safely within compliance limits: To comply with the strict requirements set by legislators, the air must be cleansed of pollutants. Our products ensure these are not vented to atmosphere, as they can cause unpleasant odours or harm people's health.

The right activated carbon – for specialist requirements too: Which activated carbon solution is the right one for your application depends on what needs to be filtered from the air. Organic substances can be removed by non-impregnated activated carbon, but inorganic substances call for specialist impregnation. Our experts will be happy to advise you here and pinpoint the right solution for your needs.

CarboTech is one of Europe's leading supplier of powdered, granulated and extruded activated carbons. The company operates integrated production plants for the manufacturing, processing and packaging of customised activated carbons, activated cokes and Carbon Molecular Sieves.

Quality: Since CarboTech works consistently with its customers interests at heart, our top priority is to constantly improve operational achievements. High demands of product and service quality go without saying for every employee.

Experience: CarboTech combines experiences from production, application and process engineering. From a strategic point of view, it has traditional requirements as much in its sights as it does innovative services. The commitment of experts with a precise knowledge of practical conditions is highly prized by our customers.

Cost-effectiveness: The use of our special activated carbon products makes permanently reliable and cost-effective solutions possible.

Furthermore we offer thorough and expert advice to all the aspects regarding the selection and application of our products.

We are looking forward to hearing from you.
