

CarboTech
The activated carbon people

THE ADVANTAGES ARE CLEAR!

Activated carbons for the food industry

Reliable decolourisation, removal of contaminants and safeguarding quality of taste: Products such as wine, sugar solutions and glycerine must be specifically treated with activated carbon during production to ensure uniform colour and consistent taste. Also, impurities arising during the manufacturing process must not be allowed to contaminate the product. Purification using activated carbon from CarboTech enables reliable treatment without the use of chemicals.

Perfectly suitable for consumer goods production: Beverage and foodstuff production has stringent requirements when it comes to the purity and compatibility of goods. CarboTech's activated carbons meet the requirements of the FCC (Food Chemicals Codex) and Germany's "ZVerkV" Additives Regulations.

The right solution for your application: CarboTech offers its customers both powdered activated carbon for stirring in as a suspension, and granulated activated carbon for fixed-bed adsorption. Deliberate pre-selection of raw materials by our experts, activation using our unique fluidised bed process and subsequent refinement all go **to ensure our products are consistently high-quality.**

CarboTech is one of Europe's leading supplier of powdered, granulated and extruded activated carbons. The company operates integrated production plants for the manufacturing, processing and packaging of customised activated carbons, activated cokes and Carbon Molecular Sieves.

Quality: Since CarboTech works consistently with its customers interests at heart, our top priority is to constantly improve operational achievements. High demands of product and service quality go without saying for every employee.

Experience: CarboTech combines experiences from production, application and process engineering. From a strategic point of view, it has traditional requirements as much in its sights as it does innovative services. The commitment of experts with a precise knowledge of practical conditions is highly prized by our customers.

Cost-effectiveness: The use of our special activated carbon products makes permanently reliable and cost-effective solutions possible.

Furthermore we offer thorough and expert advice to all the aspects regarding the selection and application of our products.

We are looking forward to hearing from you.
