

CarboTech
The activated carbon people

THE ADVANTAGES ARE CLEAR!

Activated carbons for solvent recovery

Efficient solvent recovery: Solvents released into the air are usually pollutants that need to be filtered out, or raw materials that need to be recovered. CarboTech offers several highly activated carbons that you can depend on to perform these tasks.

Staying safely within limits: When it comes to the emission of solvents into the air, it is important to remain within the strict limits set by legislators. Our high-quality activated carbon means you can comply with legal requirements for longer than with comparable products on the market – and reliably so.

High efficiency: Activating our carbon using our fluidised bed process – the only one of its kind in the world – gives it a significantly larger effective surface than other products. And activated carbons from CarboTech last for up to 10 years, saving you all the hassle of replacing and sourcing new product.

CarboTech is one of Europe's leading supplier of powdered, granulated and extruded activated carbons. The company operates integrated production plants for the manufacturing, processing and packaging of customised activated carbons, activated cokes and Carbon Molecular Sieves.

Quality: Since CarboTech works consistently with its customers interests at heart, our top priority is to constantly improve operational achievements. High demands of product and service quality go without saying for every employee.

Experience: CarboTech combines experiences from production, application and process engineering. From a strategic point of view, it has traditional requirements as much in its sights as it does innovative services. The commitment of experts with a precise knowledge of practical conditions is highly prized by our customers.

Cost-effectiveness: The use of our special activated carbon products makes permanently reliable and cost-effective solutions possible.

Furthermore we offer thorough and expert advice to all the aspects regarding the selection and application of our products.

We are looking forward to hearing from you.
