

CarboTech

The activated carbon people

THE ADVANTAGES ARE CLEAR!

Activated carbons for air filtration

Solutions for purifying air: Clean air is a requirement in many industrial applications, for example in the electrical industry, the automotive sector and the chemicals industry. Harmful airborne components such as formaldehydes, odorants, VOCs, nitrous oxides (NO_x), or sulphur dioxides can be safely removed with the aid of activated carbon from CarboTech.

Suitable products for filtration in different environments: CarboTech has a comprehensive range of activated carbons suitable for filtering all kinds of indoor air. These include pelletised carbons for pharmaceutical facilities, material for fixed-bed filters in cartridge solutions, or granulated solutions for paper filters.

Highest quality standards: Our activated carbons consistently meet the highest quality standards, ensuring the best-possible compliance with agreed filtration parameters. We have decades of experience in indoor air cleaning and know exactly what is important.

CarboTech is one of Europe's leading suppliers of powdered, granulated, and extruded activated carbons. The company operates an integrated production plant for the manufacturing, processing, and packaging of customised activated carbons, activated cokes, and carbon molecular sieves.

Quality: Since CarboTech works consistently with its customers' interests at heart, its top priority is to constantly achieve the operational excellence. High expectations for product and service quality are a matter of pride for every employee.

Experience: CarboTech combines experiences from production, application, and process engineering. From a strategic point of view, it has traditional requirements as much in its sights as it does innovative services. The commitment of experts with precise knowledge of in-field conditions is highly valued by our customers.

Cost-effectiveness: The use of CarboTech's special activated carbon products makes permanently reliable and cost-effective solutions possible.

Furthermore CarboTech offers thorough and expert advice on all aspects regarding the selection and application of their products.

The CarboTech experts look forward to hearing from you.
